

Recipes

Renastart™ is a powdered formula for use in the dietary management of pediatric kidney disease. These recipes provide ideas and fun ways to drink Renastart.

USE UNDER MEDICAL SUPERVISION

Check with your child's healthcare professional before making changes to their diet.

How to make the recipes

- ✓ Each recipe uses 100 ml (approx. 3 ½ fl oz) of Renastart at a dilution of 30 kcal/fl oz. This is made by adding 3 level scoops of Renastart to 90 ml (about 3 fl oz) of water.
- ✓ All smoothie recipes can be prepared by blending ingredients together until smooth.

Tips for adding calories and protein

- ✓ For extra calories try adding some heavy whipping cream (1 Tbsp provides 50 kcal, 0.4 g protein, 14 mg potassium, and 9 mg phosphorus).
- ✓ For more protein, try adding some dried egg whites (1 Tbsp provides 20 kcal, 4 g protein, 56 mg potassium, and 6 mg phosphorus).

Ask your dietitian if these changes are appropriate.

Cool Tips

- ✓ Try freezing one of these fruit drinks to make popsicles.
- ✓ Herbs such as mint, lemongrass, and basil can flavor fruit-containing beverages beautifully. Spices such as cinnamon and nutmeg are great for creamy beverages. Experiment to find what your child likes best.

When You Want To Chill

Mandarin & Mango Smoothie

Serves: 1

Ingredients:

100 ml Renastart (approx. 3 ½ fl oz)
1/4 cup canned mandarin segments, drained
